

# KEEP PEST BIRDS AND GEESE OFF GRASS, TURF, CROPS, BUILDINGS AND OTHER SURFACES!

# Bird Stop

Biodegradable food-grade bird and goose repellent liquid.

## What is Bird Stop?

- It's a food-grade taste aversion agent, made from a bitter, smelly derivative of concord grapes (active ingredient is methyl anthranilate).
- It renders food sources unpalatable to birds
- It irritates the birds' trigeminal system (similar to our sense of smell)

## How does it work?

- Liquid can be painted or sprayed on surfaces
- Birds are unable to habituate to the taste
- Birds are irritated by the scent
- Birds leave the treated area for a better food source
- Often, a single application brings permanent success—after 2 to 3 applications, even stubborn birds learn not to return

## Is it safe? YES.

- EPA "reduced risk"
- Biodegradable
- Developed with USDA assistance
- Chemical Family: Organic

**Pests deterred:** birds, geese, sparrows, starlings, barn swallows, pigeons, gulls, water birds, woodpeckers, etc.

**Uses:** Outdoor surfaces including grass, turf, corn, fruit crops, sunflowers, oats, trees, non-fishbearing bodies of water, nests, structures, roofs, walls, siding, statues, bridges, boat docks, etc.
