

I like multi-functional tools.... :-) Who would ever have guessed that old hockey sticks have an afterlife? Combined with [Bird-X Irri-Tape](#), they work wonders keeping the ducks and geese off our dock!

(Note from [Bird-X](#), the picture she attached shows the hockey sticks propped up like poles every few feet along the sides of the T shaped dock. [Irri-Tape](#) streamers are tied to the tops of the sticks. This note is included in case anyone wondered "what is the customer doing with those sticks!")

Thank you!!
