

Geese gone for good. Finally.

GooseBuster[®] from Bird-X

Rid your premises of these unwelcome intruders by broadcasting their own distress calls to drive them away

COVERAGE

up to **7 acres** with 1 unit up to **21 acres** with 2 units

PROTECTS

Golf Courses • Ponds & Parks • Industrial Parks
Schools • Hospital Grounds • Resorts
Corporate Landscapes • Residential Complexes

WHY REPEL GEESE

They number in the **MILLIONS** (increasing by 30% a year) and leave:

- **UNSIGHTLY MESS** (at least a *pound* of droppings per day per goose!)
- **CONTAMINATION** from increased fecal coliform levels in ponds
- **RAVAGED** grass and property
- **MONEY WASTED** cleaning, reseeding, resodding and repairing

PESTS IT REPELS

Canada geese, mallards, all other ducks and geese.

Also can be used against coots, gulls, heron, egrets and cormorants.

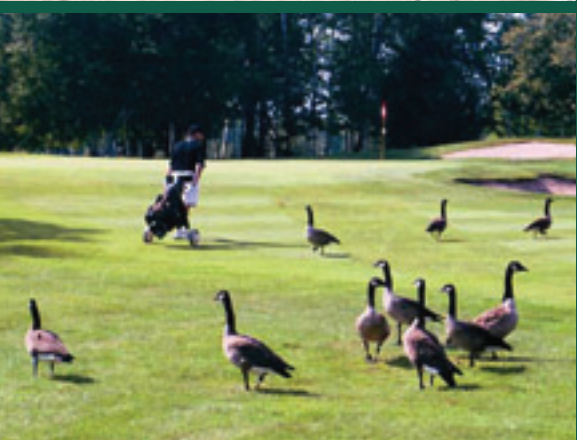

WHAT'S SO SPECIAL ABOUT GooseBuster?

- **Actual alert and alarm calls recorded in the wild.** GooseBuster is the first and only repeller to use the actual alert and alarm calls of Canada geese, recorded under natural conditions. Geese recognize these calls and respond instinctively (to 'alert' calls indicating uneasiness about potential danger and 'alarm' calls signifying immediate danger). Reacting to either, they evacuate instantly, without waiting to identify the source.
- **Different calls in random combinations.** GooseBuster broadcasts its calls in random combinations. Calls differ in frequency, duration and intervals. Sound combinations, sequences and speaker selection change randomly, leading geese to perceive many birds in many locations.
- **23 years of research.** GooseBuster is the tangible result of 23 years of research conducted by Dr. Philip Whitford, Associate Professor of Biology at Capital University. Since 1979 Dr. Whitford has been studying Canada goose behavior and vocal communications, then presenting and publishing his findings. He holds a PhD in biological sciences in the field of animal behavior, and BS and MS degrees in wildlife management. Dr. Whitford is available for consultation; please inquire.

GooseBuster has been tested and proven effective.
The research report is available upon request.

INCREMENTAL HELP FROM NATURE

- New arrivals leave abruptly in a panic, encouraging original residents to leave as well.
- GooseBuster causes other birds to exhibit *their* alarm calls, giving geese a greater sense of danger.

SUCCESS IS IN THE DETAILS

- **TIMER**—program sounds to coincide with arrival of geese
- **PROGRAMMABLE**—choose interval between calls
- **SPEAKER SEQUENCING**—imitates natural sound patterns of
 - 1) a *moving* goose, looking around at disturbances; and
 - 2) *several* agitated geese
- **RANDOM PLAY**—sounds are always changing, preventing acclimation

LONG TERM SOLUTION

Geese are stubborn and territorial, and return to the same place year after year. But GooseBuster uses this memory against them—once scared away repeatedly from your site, they will rarely return.

COVERAGE

One unit: 5 to 7 acres. **EXTRA COVERAGE** Two units: 15 to 21 acres. Field tests show that a second unit increases coverage dramatically. This additive effect more than doubles the coverage (in fact it increases up to three times) reducing the per-acre cost significantly.

Proven effective in university-conducted field studies. Published results, "Efficacy of Recorded Alarm and Alert Calls for Goose Dispersal", available upon request.

#GB GooseBuster 110vAC unit **\$850.**

#GB-220 GooseBuster 220vAC unit **\$870.**

12V DC ACCESSORIES

Optional #GB-12: **\$100.**

12vDC accessory kit includes DC battery cables with clips and DC powered timer

Optional #Solpan2: **\$250.**

Solar Power Panel to recharge 12v battery (battery not included)

SPECIFICATIONS

DIMENSIONS	Control Unit: 9" x 9" x 5.25" Speakers: 10" x 8" x 5"
SPEAKERS	8 ohms, 30 watts
WEIGHT	16 pounds
COVERAGE	One unit: 5 to 7 acres (2 to 2.8 hectares) Two units: 15 to 21 acres (6 to 8.4 hectares)
POWER REQUIREMENTS	1 amp 110 or 220vAC adaptor, or 12vDC
SOUND PRESSURE	0 – 110 dB @ 1 meter (per speaker)
FREQUENCY	500 – 1,500 Hz
COMPLIANCE	Supply power source is UL, CUL and CE listed. EPA Est. 62617-OR-001
INCLUDED	Control unit, four speakers with 100' cords, mounting hardware, complete instructions, AC power adaptor with cord, AC powered timer
