

Balcony Guard

See website for current pricing.

This low-profile **electronic bird control device** uses quiet ultrasonic sounds to repel annoying birds small outdoor areas around the home.

- **Great for patio, deck, and balcony bird control**
- Designed for residential and small area use
- Ultrasonic sound waves are discreet (nearly silent to humans)
- Easy to install – mounts nearly anywhere
- Covers up to 900 sq. ft.

Customer Testimonial

We had a bird that would bang into our window daily. After trying sprays and other methods to keep birds away, I purchased the Balcony Gard. Finally, something works to keep the birds away! Over a few days the number of bird visits decreased and then stopped altogether. You can barely hear this repeller even in the front of our house.

Great range. Definitely worth the money!

–Anonymous

Details

- Ultrasonic – emits sound frequencies that are nearly silent to humans
- Motion-activated – built-in motion sensor activates when birds move into coverage area
- Continuous operation – repels birds with 24/7 output
- Weatherproof – casing is designed to withstand outdoor use (rain cover included)
- Dual power modes: AC or batteries

Applications

Repels pest birds including pigeons, crows, sparrows, starlings, and more; also deters rodents and other small critters.

Effective coverage up to 900 sq. ft.

Recommended for use in small outdoor areas, such as:

- Balconies & porches
- Patios & gardens
