3/4" polyethylene netting seals open entries and blocks access from birds, permanently. Bird netting can be a crucial part of your bird exclusion gameplan. Our bird netting is most effective when used to keep birds out of specific areas. This bird netting is so strong it even stands up to larger animals like deer, coyotes, and dogs.

- **Permanent solution, ideal for commercial projects**
- Sensible, strong, long-lasting, and hassle-free
- Lightweight, pliable, maintenance-free material
- Allows light and moisture in
- Also excludes bats

Customer Testimonial

We currently use Bird-X bird netting to keep both birds and deer from eating our roses. The structure is enclosed with Bird-X bird netting on the top sides, dimensions are roughly 15 feet wide, 70 feet long and reaches a height of about 15 feet in the center. Thanks for a great product! We also are using one of the 'Scarecrows' to ward off deer from a flower allegedly not liked by deer. This is the first year we have had the opportunity to see it bloom.

—David H. from Monmouth, OR

Details

- 3/4" polyethylene netting
- 100% effective everywhere it is installed – great for zero-tolerance zones
- Straightforward, one-time installation – lasts up to 10 years!
- Permanent solution keeps birds out once and for all
- Lightweight, pliable, maintenance-free material
- Keeps pests out while allowing light and moisture in
- Nearly invisible – netting is barely visible at a distance
- Works to deter pest birds and other critters

Applications

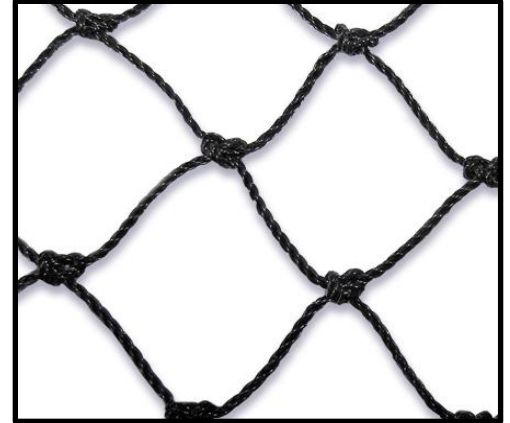

Effective where visible, up to once acre of open space.

Recommended for use in outdoor areas and semi-enclosed spaces:

- Support structures & perimeters
- Parking lots & garages
- Underpasses & bridges
- Rooftops, domes & chimneys
- Louvers, eaves, windowsills & ledges
- Beams & columns
- Statues, signs & billboards
- Air conditioners, gutters & pipes
- Etc.

Benefits

- Cut recurring cleanup and repair costs with a one-time solution
- Stop birds from entering, roosting and nesting in areas where they are unwanted, or from eating fruit or crops
- Protect buildings and equipment from corrosive droppings
- Reduce health and liability risks associated with pest bird infestation
- Prevent the spread of diseases, such as West Nile, Salmonella, E. Coli, Histoplasmosis and even rabies (found in bats)
- Eliminate fire hazards from birds building nests in vents and chimneys
- Avoid government and safety inspection failures
- Decrease nuisance for workers, customers, etc.
