

Bird Netting: Structural, Heavy Duty BirdNet

See website for current pricing.

1/2" polypropylene netting seals off all structural openings and pest bird roosting sites.

- Perfect for small businesses, homeowners, farmers and gardeners.
- Tough, plastic netting
- Lightweight, pliable, and UV-stabilized
- Won't deteriorate or lose strength when exposed to the elements
- Allows light and moisture in
- Also excludes bats

Customer Testimonial

I put 2 pieces of Bird-X Bird Netting over my 50' x 20' popcorn garden to prevent bird damage. I also put up a fence to exclude groundhogs. The net extends over the top of the fence. I was surprised to see the groundhogs climb the metal fence to enter the garden, so I sewed the edges of the BirdNet to the top of the fence. The groundhog climbed the fence and the net to reach ears 6' off the ground! He could scrape the husk off the ears through the BirdNet, but no strand of the BirdNet failed and the corn was undamaged! Next year, I may skip the fence and use bird netting to protect the garden. Oh, yes, it does also keep out the birds.

—Roger

Details

- 1/2" polypropylene netting
- 100% effective everywhere it is installed – great for zero-tolerance zones
- Straightforward, one-time installation – lasts up to 5 years!
- Retains strength over time & resists elemental damage
- Keeps pests out while allowing light and moisture in
- Nearly invisible – netting is barely visible at a distance
- Works to deter pest birds and other critters

Applications

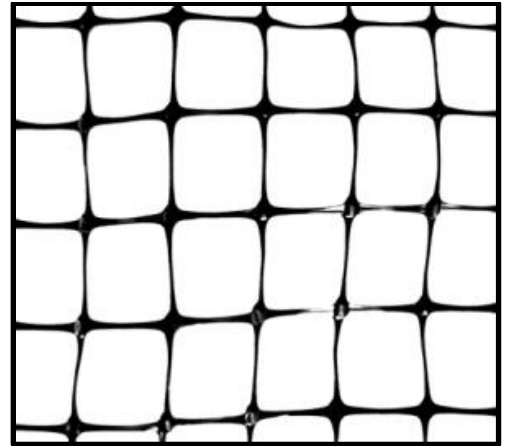

Repels all pest birds; also deters animals such as bats, deer, skunks, raccoons, etc.

Effective everywhere it is installed; various sizes available.
Recommended for excluding birds from specific areas, such as:

- Small businesses, perimeters, structural openings
- Homes, garages & rafters
- Air conditioners, gutters & pipes
- Trees & gardens
- Crops & vineyards
- Etc.

Benefits

- Cut recurring cleanup and repair costs with a one-time solution
- Stop birds from entering, roosting and nesting in areas where they are unwanted, or from eating fruit or crops
- Protect buildings and equipment from corrosive droppings
- Reduce health and liability risks associated with pest bird infestation
- Prevent the spread of diseases, such as West Nile, Salmonella, E. Coli, Histoplasmosis and even rabies (found in bats)
- Eliminate fire hazards caused by birds building nests in vents and chimneys
- Avoid government and safety inspection failures
- Decrease nuisance for workers, customers, etc.
