

Plastic Spikes

See website for current pricing.

Bird-X polycarbonate plastic bird spikes are used on buildings and structures worldwide to eliminate the roosting and nesting surfaces of pest birds. The spikes are not harmful – just extremely irritating, intimidating, and uninviting.

- 100% effective everywhere they are installed
- Repel pest birds 24/7
- Clear, light-weight, low-profile
- One-time solution – no maintenance required

Customer Testimonial

Worked great for me! These Bird Spikes are clear, slightly frosted plastic strips that come with a tube of liquid nail glue. I just glued them to some spots outside where birds were trying to nest, but really there is not enough room. Quick and easy. Now no bird nest mess. Not for commercial or large jobs, but solves a problem that I couldn't solve at Lowes or Home Depot.

–Dave E. from Arizona

Details

- 100% effective everywhere they are installed – repel birds 24/7
- Easy one-time solution – no maintenance required
- Made from recycled materials
- Clear, lightweight, low-profile bird control method
- Less expensive than metal alternatives
- Material won't corrode or decay – spikes can last a lifetime!

Applications

Repel pest birds such as pigeons, blackbirds, starlings, sparrows, seagulls, etc.

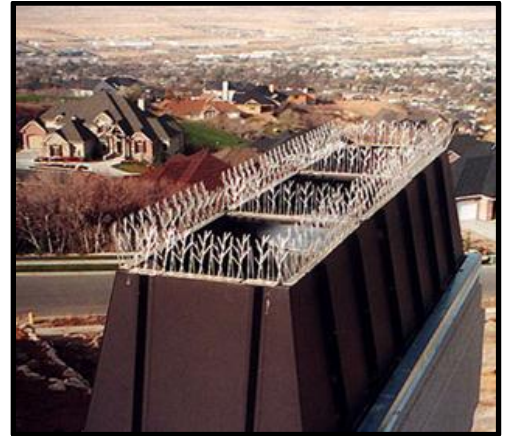

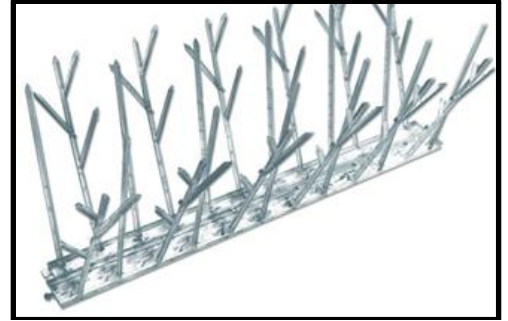

Effective everywhere they are installed; various sizes available; each section covers 1 linear ft., and a 'spread' (or width) of 4.5" or 2.25", depending on the type of spike.

Recommended for use on building edges and other surfaces that attract pest birds, such as:

- Rooftops & ledges
- Windowsills, louvers & eaves
- Support structures, beams & rafters
- Chimneys & air conditioners
- Signs & billboards

Benefits

- Cut recurring cleanup and repair costs with a one-time solution
- Stop birds from entering, roosting and nesting in areas where they are unwanted, or from eating fruit or crops
- Protect buildings and equipment from corrosive droppings
- Reduce health and liability risks associated with pest bird infestation
- Prevent the spread of diseases, such as West Nile, Salmonella, E. Coli, Histoplasmosis and even rabies (found in bats)
- Eliminate fire hazards caused by birds building nests in vents and chimneys
- Avoid government and safety inspection failures
- Decrease nuisance for workers, customers, etc.
