

Scare Eye Balloons (3-Pack)

See website for current pricing.

Keep birds away with these 3D balloon eye replicas that move with the wind and intimidate pest birds within visible range.

- Includes three balloons – one white, one yellow, one black
- Simple, cost-effective solution – hang the balloons anywhere!
- Reflective Mylar eyes and tails included for added intimidation

Scare Eye balloons are useful in many applications – homes, gardens, barns, trees, garages, marinas, doorways and more!

Customer Testimonial

We have a sour cherry tree in our yard. Every June, thousands of bright red cherries ripen and provide us with stock for a year's worth of pie making. Last year, the birds ate the entire crop off the tree before we got a chance to pick them. I was heartbroken! This year, we hung these Scare Eye Balloons in the tree (along with some of the holographic tape), and I am happy to say that I harvested a huge crop of ripe red cherries this year – birds stayed away!

–Anonymous

Details

- Predator decoy; 3D balloons
- Three balloons included: one (1) white, one (1) black, and one (1) yellow
- Includes mylar eyes, mylar tails, and strings for each balloon
- Weatherproof, vinyl, inflatable balloon
- Design exaggerates the glaring stare and gaping mouth of natural predators
- Wind causes the Scare-Eye Balloons to move in the wind, increasing efficacy
- Easy installation

Applications

Target pests include: pigeons, sparrows, starlings, woodpeckers, swallows, crows, blackbirds, grackles, and waterbirds such as geese, ducks and seagulls.

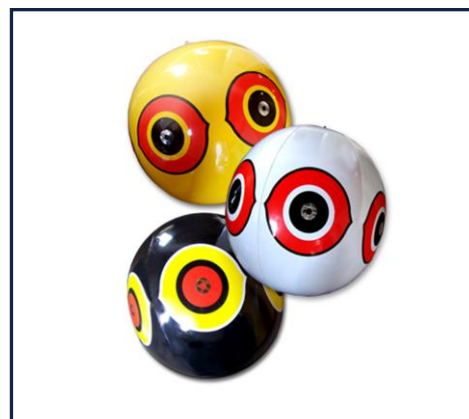

Effective where visible, up to 6,000 sq. ft. (per balloon).

Recommended as a low-budget solution for open outdoor areas, such as:

- Homes, gardens, porches, patios
- Small farm fields, barns, stables, orchards, vineyards
- Loading docks, hangars, substations
- Garages, parking lots, building rooftops
- Outdoor restaurants
- Marinas
- Etc.

Benefits

- Prevent crop loss and other property damage
- Cut recurring cleanup and repair costs
- Protect buildings, equipment, and vehicles from corrosive bird droppings
- Reduce health and liability risks associated with pest bird infestation
- Save outdoor grounds from bird damage
- Decrease nuisance for residents, workers, customers, etc.
- Increase property aesthetics
- Decrease nuisance for residents, workers, customers, etc.
