

Yard Gard

See website for current pricing.

Yard Gard is an electronic pest control device and animal repeller. YardGard keeps unwanted pest animals away with ultrasonic (nearly silent-to-humans) high-frequency sound waves irritate and intimidate pest animals, making the affected area inhospitable.

- Repel mice, squirrels, deer, raccoon, rabbits and other small animals
- Built-in motion detector activates when pests move into coverage zone
- Discreet, low-profile solution for yards, decks, and patios
- No more traps or pesticides – safe to use around children and pets!
- Simple, affordable, and eco-friendly
- Covers up to 4,000 sq. ft.

Customer Testimonial

For 20 years, I bought all kinds of squirrel and raccoon repellers. They had been destroying the bird feeders I regularly hung in my yard. In desperation, I bought the Yard Gard, concerned that if I cut down the raccoon visits I might lose the birds in the process. Yard Gard has done the trick – more than we ever dreamed possible! I am only sorry I didn't discover this about 20 feeders ago!

–Linda from St. Paul, MN

Details

- Deters pest animals with ultrasonic (silent-to-humans) sound waves
- Built-in infrared motion detector
- Continuous or motion-sensor operation modes
- Mount Yard Gard anywhere with keyhole slot
