

Block pest birds from their "landing strips" with

BIRD-X SPIKES

The most effective "keep off" sign you can post.

**NOTHING
COMES
CLOSE! SM**

Birds instinctively fly to "landing strips" such as roof ledges, windowsills, building projections, signs, statues, trusses and beams. But now you can keep them from landing on your property...easily, inexpensively...and permanently!

All it takes is an application of SPIKES needle strips from BIRD-X. There's nothing like this new roost inhibitor from the world's acknowledged leader in bird control products.

BIRD-X SPIKES™

**NOTHING
COMES
CLOSE!™**

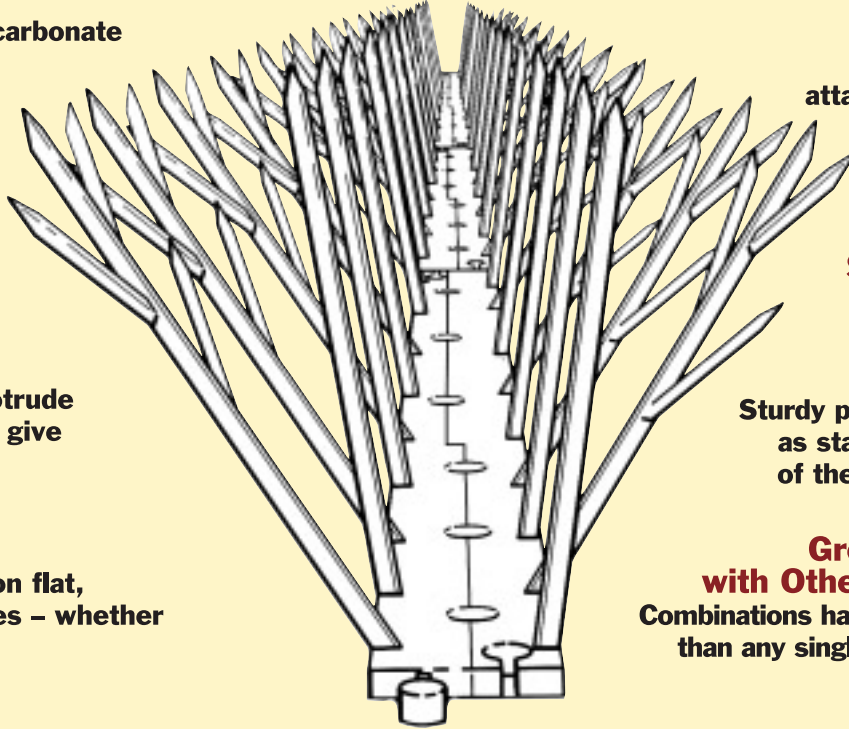

Here's why SPIKES works so well:

Tough. Long-lasting polycarbonate provides decades of maintenance-free protection.

Transparent. It does the job without marring the look of your property. It's practically invisible.

Dense. Top branches protrude from the vertical shafts to give impenetrable coverage. No need to double up.

Flexible. Mounts easily on flat, curved or irregular surfaces – whether wood, metal or masonry.

Easy to Install. Stackable 12" sections attach quickly with SPIKES Special Adhesive, nails, screws, wire ties, etc.

Environmentally Safe and Non-lethal. Nothing to rust or deteriorate.

Economical. Sturdy plastic does the same job as stainless steel at a fraction of the cost. One-foot modules minimize waste.

Great Working Partner with Other BIRD-X Products. Combinations have proved more effective than any single product working alone.

Use SPIKES in a variety of applications...

Architectural Details

Rooftops

Ledges

STANDARD SPIKES Model #SPK1
