

AviShock™

The Smarter, Safer Way to Keep Birds Away

Pest birds are more than just a nuisance—they pose significant health, safety, and financial risks to parking garage owners and managers. From unsightly droppings to costly structural damage, birds can compromise the integrity and appearance of your facility. AviShock™ offers a humane, effective, and innovative solution to this persistent problem. Our low-profile, electrified bird deterrent system conditions birds to avoid your property without causing harm, ensuring a cleaner, safer, and more professional environment for your customers and staff.

The Problem: Pest Birds in Parking Garages

Pest birds are persistent and costly for parking garage owners and managers. Birds nesting in garages lead to:

- **Health Hazards:** Bird droppings can spread diseases and create unsanitary conditions.
- **Structural Damage:** Droppings and nesting materials can corrode surfaces, clog drainage systems, and damage equipment.
- **Aesthetic Issues:** Bird mess on signage, lighting, and walkways detracts from the professional appearance of your facility.
- **Increased Maintenance Costs:** Frequent clean-ups and repairs add unnecessary expenses.

The Solution: AviShock

AviShock™ is a low-profile, electrified bird deterrent system designed to effectively repel all species of pest birds without harming them. Its innovative design and humane approach make it the perfect solution for parking garages.

Why AviShock™?

- 1. Humane and Effective:**
 - Delivers a mild, non-lethal shock that conditions birds to avoid the area.
 - Safe for birds, pets, and people.
- 2. Flexible and Adaptable:**
 - Conforms to any architectural configuration—curves, ledges, beams, and more.
 - Only 1/4-inch high, ensuring a clean, low-profile appearance.
- 3. Durable and Weatherproof:**
 - UV-stabilized PVC track withstands all weather conditions.
 - Copper conductors ensure long-lasting performance.
- 4. Eco-Friendly and Low Maintenance:**
 - Operates on solar energy or mains power.
 - No chemicals or poison, environmentally safe.
- 5. Versatile Applications:**
 - Ideal for ledges, trusses, parapets, signage, lighting, pipes, HVAC units, and other architectural features in parking garages.

AviShock™

The Smarter, Safer Way to Keep Birds Away

Key Features

- **Low-Profile Design:** Blends seamlessly with any surface. Used extensively on heritage sites and modern building designs.
- **Flexible Track:** Easily cut and installed on curved or flat surfaces.
- **Multiple Colors:** Black, grey, or stone colors are available for discreet integration.
- **Durable:** Conductive polymer covers highly conductive copper to prevent weathering. Outlasts similar products with metal braiding construction.

Applications in Parking Garages

- **Ledges and Parapets:** Prevent birds from roosting on elevated surfaces.
- **Signage and Lighting:** Keep bird droppings off critical areas.
- **HVAC Units and Pipes:** Protect equipment from damage and clogging.
- **Eaves and Beams:** Deter birds from nesting in structural elements.

Benefits for Parking Garage Owners

- **Reduce Maintenance Costs:** Minimize clean-up and repair expenses.
- **Enhance Safety:** Eliminate health hazards caused by bird droppings.
- **Improve Aesthetics:** Maintain a clean, professional appearance.
- **Long-Term Solution:** AviShock™ provides lasting protection against pest birds.
