

Bird Balls

Protect Bodies of Water with Up to 99% Surface Coverage

Bird Balls create an effective barrier on the surface of water, preventing geese, ducks, swans, gulls, and other wildlife from entering or interacting with the area. The visual disruption makes the water unappealing to pest birds and wildlife—they simply don't recognize it as water.

Key Features & Benefits

- **Effective Bird & Wildlife Control:** Deters a wide range of nuisance birds and animals from your water sources.
- **Odor Control:** Helps minimize unpleasant smells caused by stagnant water.
- **Algae Control:** Reduces the growth of algae by limiting sunlight penetration.
- **Durable & Long-Lasting:** Made from 100% high-density polyethylene (HDPE), Bird Balls are weather-resistant and last up to 25 years.
- **Quick & Easy Installation:** Get up and running with minimal effort.
- **Low Maintenance:** These floating covers require little to no upkeep.
- **Energy Savings:** Insulating properties can save up to 85% on heating costs
- **Minimize Evaporation:** Decrease liquid loss by up to 95%.
- **Lower Chemical Usage:** Help maintain a stable water environment, reducing the need for costly chemical treatments.
- **Worry-Free Protection:** Includes a 10-year warranty against cracks and wear.

Armor Ball AQUA

- Covers up to 90% of water surface
- Lasts up to 25 years

Hexprotect AQUA

- Covers up to 99% of water surface
- Lasts between 20-25 years
- Will not stack, roll, or blow in the wind
- Maintains coverage in open spaces with high wind exposure

Rhomb Hexoshield

- Covers up to 99% of water surface
- Lasts between 20-25 years
- Recommended in applications with tight fitting areas such as clarifiers, pools and water troughs
