

Plastic Bird Spikes

Polycarbonate Spikes Designed for Versatile Surface Protection

Plastic Bird Spikes provide lasting protection against pest birds. Made from UV-treated polycarbonate, these lightweight spikes are built to withstand outdoor conditions without rusting or conducting electricity—making them ideal for rooftops, ledges, signs, and more. Especially well-suited for coastal environments, Plastic Bird Spikes resist salt, moisture, and sun exposure.

Key Features

- **Durable Material:** UV-treated polycarbonate resists cracking, fading, and weather damage.
- **Flexible Base:** Adapts to curved or uneven surfaces for a secure fit.
- **Ideal for Coastal Areas:** Non-metal construction resists salt corrosion and moisture.
- **Size Options:** Available in Slim and Standard widths to accommodate various surfaces.
- **Easy to Install:** Compatible with adhesive, 1/8" self-tapping screws, or nails.
- **Modular Packaging:** 1-foot sections sold in boxes of 10, 25, 50, or 100 feet.
- **Non-Conductive & Rust-Free:** Safe for use near electrical equipment and in marine environments.
- **Warranty Protection:** Includes a 5-year warranty against defects in materials and workmanship.

Applications

- Ledges and building edges
- Rooftops and parapets
- Signage and architectural accents
- Gutters and downspouts
- HVAC units and rooftop equipment
- Window sills and cornices
- Beams, rafters, and trusses
- Fences and railings
- Chimneys and vents
- Canopies and awnings
- Commercial, industrial, and residential structures
