

Bird Deflector

Reflective, movable visual scare & physical deterrent

The Bird Deflector is a weatherproof physical deterrent and a visual scare device that can be affixed to flat surfaces that get direct exposure to sun and wind. Wind causes the Bird Deflector to spin while sunlight creates bright, flashing light that disorients and irritates pest birds. The multi-sensory attack scares pest birds away from the area.

Key Features

- **Adjustable for Maximum Versatility:** Precision-engineered adjustable mount allows adjustment between 90° and 180°, ensuring optimal positioning.
- **Weather Resistant:** Built with corrosion-resistant, outdoor-grade aluminum and weather-resistant plastic ensures lasting performance through extreme weather conditions, from harsh sunlight to heavy rain and snow.
- **Easy Installation:** Hassle-free setup with three versatile mounting options - glue, screw, or tie-down methods give you complete installation flexibility. The universal mounting system works on any flat surface.
- **Humane:** Chemical-free bird control that harnesses natural sunlight and wind movement to safely keep birds away without causing harm.

Applications

- Rooftops
- Porches, balconies, patios
- Waterfront property
- Boats, harbors, docks, marinas
- Barns, stables
- Gardens
- Parking lots

Technical Specifications

- **SKU:** BD
- **Dimensions:** 10" x 10" x 7"
- **Material:** Aluminum and Metallic Coated Plastic
- **Weight:** 1.15 lb.
