

Bird Proof® Gel

Professional-Grade Bird Repellent Solution

Bird Proof® Gel is a professional-grade surface repellent that provides an invisible, long-lasting solution to bird-related problems. Designed to deter birds from landing, perching, or roosting, this surface-repellent gel offers a discreet, effective, and long-lasting approach to bird control. Whether for signs, ledges, or entrances, the sticky texture of Bird Proof® Gel makes treated surfaces uncomfortable for birds, encouraging them to seek alternative locations.

Key Features

- **Non-Toxic & Safe:** Does not harm birds when applied as directed.
- **Discreet & Low-Profile:** Clear gel blends seamlessly with your building's design.
- **Long-Lasting Effectiveness:** Remains active for up to 1 year with minimal upkeep.
- **Wide Coverage:** Each tube covers 10 linear feet (case of 12 covers 120 linear feet).
- **Versatile Application:** Ideal for ledges, sills, beams, rafters, and other indoor or outdoor surfaces.

Why Choose Bird Proof® Gel?

- **Protect Your Property:** Prevent damage to rooftops, walls, equipment, and vehicles caused by corrosive bird droppings.
- **Reduce Costs:** Cut recurring cleanup and repair expenses.

Specifications

- **Part Number:** BP-CART
- **Coverage:** 10 linear feet per tube (case of 12 covers 120 linear feet).
- **Longevity:** Effective for up to 1 year.
- **Safety:** Non-toxic and environmentally safe when used as directed.

- **Improve Safety:** Eliminate fire hazards caused by bird nests in vents and chimneys.
- **Mitigate Health Risks:** Reduce exposure to diseases like West Nile Virus, Salmonella, and E. Coli.
- **Enhance Aesthetics:** Maintain your property's appearance with an invisible, effective solution.
- **Comply with Regulations:** Avoid government and safety inspection failures.
- **Minimize Nuisance:** Create a more pleasant environment for residents, workers, and customers.

How It Works

The sticky texture of Bird Proof® Gel feels uncomfortable on birds' feet, deterring them from landing or roosting. Once applied, birds associate the treated surface with discomfort and avoid returning.

Applications

- Ledges
- Rafters
- Signs
- Sills
- Beams
- Entrances
