GooseBuster Pro® – Premium Bundle

Protect Your Property from Pesky Geese and Birds

Canada Geese are a protected species under the Migratory Birds Convention Act of 1994, which prohibits any person from intentionally capturing, hunting, or killing any migratory bird except under the terms of a permit issued by the Department of Interior, U.S. Fish, and Wildlife Service.

So, how do you protect your property from geese and their droppings? Bird-X, a leader in Bird control, has assembled the GooseBuster® Premium Bundle, an all-in-one solution for commercial and residential property owners. Combining cutting-edge technology and proven deterrents, this bundle provides a humane, effective, legal, and long-lasting way to safeguard lawns, ponds, rooftops, and outdoor spaces.

What's Included:

1. GooseBuster® Pro: A scientifically proven sound system that mimics Canada goose alert and alarm calls. Constantly changing frequencies and combinations ensure geese feel threatened and evacuate without harm.

2. Two 3-D Coyotes: Lifelike predator decoys with moving tails that scare geese and birds from a distance. Their 3D design ensures visibility from all angles and is more effective than standard cutouts.

3. Bird Stop® Liquid: A USDA-developed formula that creates an invisible barrier, irritating birds' trigeminal systems (similar to smell for humans). Harmless but highly effective, it deters birds from landing, feeding, and loitering.

4. 100 Feet of Irri-Tape: Reflective tape that adds a visual deterrent to keep birds away.

This bundle offers a cost-effective and environmentally friendly solution to reclaim your property from unwanted pests. Contact us today to learn more or place your order!
