

# LASER SAFETY CERTIFICATION Industrial Training Programs

- ✔ OSHA Compliant
- ✔ ANSI Z136.1
- ✔ 100% Online & Self-Paced
- ✔ Printable Certificate

## Protect Your Workforce. Meet Federal Standards.

Lasers are one of the most powerful and versatile tools in modern industry — and with that power comes the responsibility to use them safely. From eye and skin exposure to non-beam considerations that are easy to overlook, a little preparation goes a long way toward keeping your team confident and protected. Courses are 100% online, OSHA compliant, and meet the ANSI Z136.1 standard, with a printable certificate issued upon completion. Whether you're training front-line technicians or designating a Laser Safety Officer, we have a program that fits your team.

OSHA requires each employer to certify its operators in accordance with its in-house laser safety program. Employers, entities, or individuals with legal issues or questions regarding workplace safety and OSHA compliance should consult an attorney.
