

Mist Nets

Gentle capture technology for birds and bats

Mist nets are the go-to tool for professionals who need to safely and humanely capture birds or bats. Made from ultra-fine, nearly invisible fibers, these nets are engineered for minimal stress and maximum effectiveness—ideal for both pest control and research.

Why Choose Our Mist Nets?

- Ultra-thin, UV-resistant nylon/polyester fibers
- $\frac{3}{4}$ " mesh ideal for small birds like sparrows and swallows
- Virtually invisible—birds never see it coming
- Loose netting design creates natural capture pockets, reducing injury and stress

Applications

- Professional pest bird control
- Safe removal from sensitive environments like food processing plants
- Ornithological research and bird banding
- Chiropterology (bat studies and management)

Available Sizes

- 7' x 20' (140 sq. ft.)
- 8' x 30' (240 sq. ft.)
- 8' x 40' (320 sq. ft.)

Mist Net Kit Includes:

- 1 Mist Net
- 2 Fiberglass Extension Poles
- 2 Heavy-Duty Hooks with 140 lb. Magnets for Secure Mounting
- 1 Carry Case for Easy Transport & Storage
- Step-by-Step Instructions for Effective Use

Part Numbers

- NET-MIST 7X20
- NET-MIST 8X30
- NET-MIST 8X40
- NET-MIST-KIT
