

## Premium HDPE BirdNet

Constructed from high-density polyethylene (HDPE), Premium BirdNet creates a durable physical barrier to help prevent birds from accessing treated areas. The heavy-duty design supports long-term use in a variety of environments where bird exclusion is required.

### Key Features & Benefits

- **Non-conductive construction:** Polyethylene does not conduct electricity, allowing installation near wiring and electrical components.
- **Moisture-resistant design:** Does not absorb water in wet, humid, and outdoor conditions.
- **UV-stabilized polyethylene:** Includes UV inhibitors to reduce degradation from prolonged sun exposure.
- **High-strength flame-resistant netting:** Multi-strand construction enhances durability and resistance to tearing.
- **Low-visibility appearance:** Discreet design of black netting minimizes visual impact in most installations.

= this item is included in the Bird-X PCO Select™ Program. Learn more at [bird-x.com/pco-select](http://bird-x.com/pco-select)

### Specifications

**Hole Openings:** Available in 3/4" (0.75 in), 1 1/8" (1.125 inches), and 2"

**Material:** HDPE Heavy Duty Polyethylene

**Construction:** 12/6 - 6 mono-filaments of UV protected HDPE each 0.012" diameter. PE is twisted and knotted for added strength.

**Colors:** Black or stone

**Warranty:** 10-year warranty against material defects and workmanship
