

Optical Gel

Optical Gel is a multi-sensory bird repellent that deters birds using sight, smell and touch. The gel disks are perceived as a safety hazard to pest birds by creating an illusion of fire or smoke, prompting them to avoid the treated area. Additionally, the citronella & peppermint scent combined with the sticky texture of the gel offers a multi-layered defense against birds, making it an effective solution for bird control. Optical Gel is not made with polybutylene, making this product truly all natural & eco-friendly.

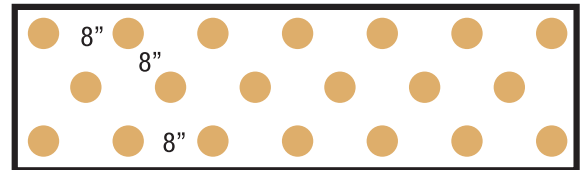

Benefits

- ✓ Discreet
- ✓ Easy installation
- ✓ Environmentally friendly
- ✓ Lasts 4+ years
- ✓ 2-year warranty when installed according to manufacturer specifications

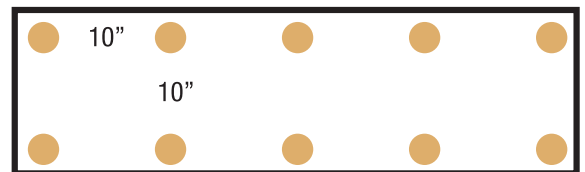

Nesting Sites: 6 in. maximum spacing

Night Roosting Sites: 8 in. maximum spacing

Day Roosting Sites: 10 in. maximum spacing

Specifications

SKUs: BG-CUP-OG, BG-CUP-OG-200, BG-CUP-OG-48, BG-CUP-OG-MAG

Target Species: All species, all bird pressures (heavy, medium, and light)
