

Specifications

Part Numbers: YG, YG/220, YG/240
Species: Rodents, bats, rabbits, cats, dogs, skunks, opossums, armadillos, raccoons, deer
Frequency Range: 15 to 25 kHz (adjustable)
Motion Sensor Range: 35' x 70'
Coverage: Up to 10 meters
Listings: CE Marked. Supply power source is UL listed.
Dimensions: 6.75" x 5.5" x 3.5"
Cord Length: 30 ft.
Shipping Dimensions: 10" x 8" x 4"
Shipping Weight: 3 lbs.

Yard Gard

Protect your property with Yard Gard, a safe and effective solution for keeping nuisance animals away. Using advanced ultrasonic technology, Yard Gard emits ultrasonic sound waves that are silent to humans but powerfully disruptive to unwanted animals such as rodents, deer, skunks, raccoons, and more. This humane approach drives pests out without harm, safeguarding your home, yard, or business.

With coverage of up to 10 linear meters and fully adjustable settings, Yard Gard gives you precise control and lasting peace of mind—all in a weather-resistant, discreet design.

Key Features & Benefits

- **Powerful Ultrasonic Defense:** Emits high-frequency sound that people can't hear—but nuisance animals can't stand—keeping them away without traps, chemicals, or harm.
- **Customizable Protection:** Adjustable frequency range (15–25 kHz) lets you target a wide variety of pests for maximum effectiveness.
- **Built for the Outdoors:** Weather-resistant housing ensures reliable performance year-round, even in tough conditions.

- **Discreet & Space-Saving:** Compact design blends easily into any environment without drawing attention.
- **Saves Time & Money:** Prevents costly damage to property, equipment, and vehicles while reducing cleanup from droppings and nesting.

Applications

- Gardens, yards and lawns
- Courtyards
- Patios and decks
- Docks and marinas
- Pools

Package Includes

- Control Unit
- Power adapter
