

Bird Stop®

Repel Birds Safely and Effectively with Bird Stop®

The BEST-SELLING solution for protecting your property from unwanted birds! Bird Stop® liquid creates an invisible barrier that irritates birds' trigeminal systems (similar to our sense of smell), encouraging them to leave without harm. Whether dealing with birds feeding, loitering, or landing, Bird Stop® is the proven solution you can trust.

What Makes Bird Stop® So Effective?

The active ingredient in Bird Stop®, methyl anthranilate—a bitter, smelly derivative of concord grapes—has a taste and smell that birds avoid. This natural compound irritates their trigeminal systems, prompting birds to leave the treated area in search of a better food source.

- **Fast Results:** Often, a single application delivers permanent success.
- **Stubborn Birds? No Problem!:** After 2–3 applications, even the most persistent birds learn not to return.

Why Choose Bird Stop®?

- **Harmless but Potent:** Scientifically developed to repel birds without causing harm.
- **No Harmful Chemicals:** Safe for use in sensitive environments.
- **Completely Invisible:** Leaves no visible residue.
- **Safe for All:** Suitable for use around children, plants, and food crops.

Target Species

- Pigeons
- Starlings
- Seagulls
- Blackbirds
- Grackles
- Crows
- Barn Swallows
- House Sparrows
